# 1.Introduction

Brief introduction of the test strategies, process, workflow and methodologies used for the project

## 1.1 Scope

### 1.1.1 In Scope

Functional testing of property visit form

### 1.1.2 Out of Scope

Non functional testing is out of scope.

## 1.2 Quality Objective

Objectives of testing project are :

- Ensure the Application Under Test conforms to functional requirements
- Ensure the AUT meets the quality specifications defined by the client
- Bugs/issues are identified and fixed before go live

## 1.3 Roles and Responsibilities

Description of the Roles are :

- QA Analyst , creates the test plan, automated tests and test report to validate the correctness of the implemented product.
- Product owner, provides the functional specifications for the Property Visit form.
- Developers , Implement the defined functional specifications.

## 2. Test Methodology

### 2.1 Overview

---

The test methodology selected for the project is

- Agile

### 2.2 Test Levels

Test levels are :

- Functional testing

### 2.3 Test Completeness

Test Completeness is defined when :

- 100% test coverage
- All Manual & Automated Test cases executed
- All open bugs are fixed or will be fixed in next release

## 3. Test Deliverables

Here are the test deliverables

- Test Plan
- Test Cases
- Bug Reports

## 4.Resource & Environment Needs

### 4.1Testing Tools

Test tools are :

- Requirements Tracking Tool : Trello
- Bug Tracking Tool : JIRA
- Automation Tools : Selenium, pytest

### 4.2 Test Environment

- Windows 10
- Chrome 90.0.4430.212

## 5. Terms/Acronyms

- Make a mention of any terms or acronyms used in the project

TERM/ACRONYM	DEFINITION
AUT	Application Under Test
